Safety Instructions

- 1** Before connecting the AC power cord to the DC adapter outlet, make sure the voltage designation of the DC adapter corresponds to the local electrical supply.
- 2** Never insert anything metallic into the openings in the cabinet of the LCD monitor; doing so may create the danger of electric shock.
- 3** To avoid electric shock, never touch the inside of the LCD. Only a qualified technician should open the case of the LCD.
- 4** Never use your LCD if the power cord has been damaged. Do not allow anything to rest on the power cord, and keep the cord away from areas where people can trip over it.
- 5** Be sure to hold the plug, not the cord, when disconnecting the LCD from an electric socket.
- 6** Openings in the LCD cabinet are provided for ventilation. To prevent overheating, these openings should not be blocked or covered. Also, avoid using the LCD on a bed, sofa, rug, or other soft surface. Doing so may block the ventilation openings in the bottom of the cabinet. If you put the LCD in a bookcase or some other enclosed space, be sure to provide adequate ventilation.
- 7** Put your LCD in a location with low humidity and a minimum of dust.
- 8** Do not expose the LCD to rain or use it near water (in kitchens, near swimming pools, etc.). If the LCD accidentally gets wet, unplug it and contact an authorized dealer immediately. You can clean the LCD with a damp cloth when necessary, but be sure to unplug the LCD first.
- 9** Place the LCD on a solid surface and treat it carefully. The screen is made of thin glass with a plastic front surface and can be damaged if dropped, hit or scratched. Do not clean the front panel with keton-type materials (e.g., acetone), ethyl alcohol, toluene, ethyl acid, methyl, or chloride – these may damage the panel.
- 10** Locate your LCD near an easily accessible AC outlet.
- 11** If your LCD does not operate normally – in particular, if there are any unusual sounds or smells coming from it – unplug it immediately and contact an authorized dealer or service center.
- 12** High temperature can cause problems. Don't use your LCD in direct sunlight, and keep it away from heaters, stoves, fireplaces, and other sources of heat.
- 13** Unplug the LCD when it is going to be left unused for an extended period of time.
- 14** Unplug your LCD from the AC outlet before any service.

Unpacking Your Monitor

Please make sure the following items are included with your monitor. If any items are missing, contact your dealer.

Diskette

Pivot software
(optional)

Warranty Card
(Not available in all locations)

Manual

DC Adapter
(Optional)

Monitor and Base†

Power Cord

15-pin D-Sub Signal Cable

Speaker Cable
(Optional)

Microphone Output Cable
(Optional)

Monitor and Base†

† Your monitor may come equipped with one of five different stands, or none at all, according to the option you selected at the time of purchase. Contact your dealer if you want a different base.

Wire-frame base

Angle-Pivot base

Simple base

Multimedia base

Pivot Multimedia base

Setting up Your Monitor

Setting up an Ergonomic Workstation

Consider the advice given below before you install your monitor.

Monitor location

Choose a position that exposes your monitor to the least reflection from lights or windows, usually at a right angle to any window.

Workstation height

Place your LCD monitor so that the top of the screen is slightly below your eye level when you are comfortably seated.

Viewing angle

Tilt the screen backward or forward to a comfortable viewing position.

Figure 1. Tilt the screen

Kensington Security Slot

This monitor offers you the opportunity to secure your monitor using a Kensington-type security device. Kensington lock not included. Refer to your locking device documentation for installation instructions.

Figure 2. Kensington-type security slot location

Setting up Your Monitor

Connecting Your LCD Monitor

Figure 3. Cable connections

- 1** Turn off your computer and unplug its power cord.
- 2** Connect the signal cable to the 15-pin D-sub connector on the back of your monitor.
- 3** Connect the signal cable to the video port on your computer, video board, video card, or graphics card.
- 4** Connect the power cord for your monitor to the DC adapter and connect the adapter jack to the DC power port on the back of your monitor.
- 5** Plug the computer and monitor power cords into a nearby power mains outlet.
- 6** Turn your computer and monitor on. If your monitor displays an image, it has been successfully installed.
- 7** If necessary, install the video driver for this monitor (see "Installing the Video Driver" on page 7).
- 8** After your monitor has been fully installed, run Auto Adjustment (see page 11).

Setting up Your Monitor

Connecting Your Multimedia LCD Monitor

Figure 4. Multimedia connections

- 1 Follow steps 1 through 3 on the previous page.
- 2 If you have a Multimedia or Multimedia Pivot stand, connect the attached power adapter jack (A) to the DC power port on the back of your monitor. Connect the power cord to the power port on the back of the stand.
- 3 Follow the directions that came with your sound card or your computer to connect the speakers and microphone on the stand. See Figure 4, above and Table 1, below.
- 4 Continue with step 5 on the previous page.

Table 1. Connector locations for multimedia bases

| Item | Name | Description |
|------|------------------------------------|---|
| A | Attached power adapter jack | Connect this cable to the DC power port on the back of the monitor cabinet. |
| B | Power port | Connect the power cable here. |
| C | Power switch | Use this switch to turn the monitor On and Off. |
| D | MIC OUT jack | Connect a cable here to send sound from the internal microphone to the computer's sound card. |

Setting up Your Monitor

Table 1. Connector locations for multimedia bases (*Continued*)

| Item | Name | Description |
|----------|---------------------------------|--|
| E | AUDIO IN jack | Connect a cable here to bring sound from your computer's sound card. |
| F | External microphone jack | Connect an external microphone here. Using an external microphone automatically disconnects the monitor's internal microphone. |
| G | Headphone jack | Connect headphones here. Connecting headphones automatically turns the speakers off. |

Plug and Play

Our adoption of the new VESA® Plug and Play solution eliminates complicated and time consuming setup. It allows you to install your monitor in a Plug and Play compatible system without the usual hassles and confusion. Your PC system can easily identify and configure itself for use with your display. This monitor automatically tells the PC system its Extended Display Identification (EDID) data using Display Data Channel (DDC) protocols so the PC system can automatically configure itself to use the LCD. If your PC system needs a video driver, following the instructions given below according to the operating system your computer uses.

Installing the Video Driver

When prompted by the operating system for the monitor driver, insert the Driver diskette (or CD) included with this monitor. Driver installation is slightly different from one operating system to another. Follow the directions as appropriate for the operating system you have.

Windows® 98

- 1** Windows® 98 will auto-detect your new monitor and start the "Add New Hardware Wizard" if the drivers are not already installed. Click the **NEXT** button to search for drivers.
- 2** Check the diskette (or CD-ROM) drive box to install the drivers off the diskette (or CD) provided with your LCD monitor and click **NEXT**.
- 3** Confirm that Windows found the driver on the diskette (or CD) and click **NEXT** again to install the driver.

To manually install or update the driver, follow the directions below:

Setting up Your Monitor

- 1** Click on **START, SETTINGS, CONTROL PANEL, DISPLAY SETTINGS** tab, **ADVANCED, MONITOR** tab, **CHANGE**. This will start the "Add New Hardware Wizard".
- 2** Follow the same directions as given in the steps in the section above.

Windows® 95

To determine the version of Windows® 95 that your computer uses, right click on the "My Computer" icon on the Windows desktop and select "Properties". The version number can be seen on the "General" section under "System". Follow the directions given below according to the version of your Windows® 95 operating system:

Version 4.00.950A

- 1** Click on **START, SETTINGS, CONTROL PANEL, DISPLAY SETTINGS** tab, **CHANGE DISPLAY TYPE, CHANGE, HAVE DISK**.
- 2** Type the diskette (or CD) letter in the box and click **OK**.

Version 4.00.950B

- 1** Click on **START, SETTINGS, CONTROL PANEL, DISPLAY, ADVANCED PROPERTIES, MONITOR** tab, **HAVE DISK**.
- 2** Type the diskette (or CD) letter in the box and click **OK**.

Self-Test Feature Check (STFC)

Your monitor provides a self test feature that allows you to check whether your monitor is functioning properly. If your monitor and computer are properly connected but the monitor screen remains dark and the power indicator is blinking, run the monitor self-test by performing the following steps:

- 1** Turn off both your computer and the monitor.
- 2** Unplug the video cable from the back of the computer.
- 3** Turn on the monitor.

Setting up Your Monitor

If the monitor is functioning properly, you will see a white box with a red border and black text inside as shown in the following illustration:

Figure 5. Monitor self test screen

The three boxes inside the border are red, green and blue. Failure of any of the boxes to appear indicates a problem with your monitor. This box also appears during normal operation if the video cable becomes disconnected or damaged.

4 Turn off your monitor and reconnect the video cable; then turn on both your computer and the monitor.

If your monitor screen remains blank after using the previous procedure, check your video controller and computer system; your monitor is functioning properly.

Getting Help

If your monitor does not display an image, check your cable connections and refer to "Troubleshooting" on page 20. If you experience difficulties with the quality of the displayed image, run Auto Adjustment (see page 11) and refer to "Adjusting Your LCD" on page 10 or "Troubleshooting" on page 20.

Warm-up Time

All LCD monitors need time to become thermally stable the first time you turn them on each day. Therefore, to achieve more accurate adjustments for parameters, allow the LCD monitor to warm (be on) for at least 20 minutes before making any screen adjustments.

Adjusting Your LCD Monitor

User Controls

Your LCD allows you to easily adjust the characteristics of the image being displayed. All of these adjustments are made using the control buttons on the front of the monitor. While you use these buttons to adjust the controls, an OSD shows you their numeric values as they change.

Figure 6. User control locations

| No. | Name | Description |
|-----|---------------------------------------|--|
| 1 | AUTO | ■ Activates the Auto Adjustment function. |
| 2 | EXIT | ■ Exits from menus and sub-menus. ■ Exits from the on screen display (OSD). |
| 3 | Power indicator | ■ Glows green during normal operation. ■ Glows amber while the monitor is in a power saving mode and if the signal cable becomes disconnected. |
| 4 | Power button | ■ Turns the monitor on and off. |
| 5 | Brightness - / + | ■ Moves the selector between menus and sub-menus on the OSD. ■ Decreases or increases values of the selected function. ■ Directly adjusts the brightness level if pressed while the OSD is off (See the section on "Direct-Access Features" on page 11). |
| 6 | MENU | ■ Opens the OSD system and sub-menus. ■ Selects the highlighted function. |

Adjusting Your LCD Monitor

Automatic Save

Whenever you open the OSD and allow an adjustment window to remain active for about 3 seconds without pressing another button, the monitor automatically saves any adjustments you have made. These changes are saved into a user area in the monitor. User areas are reserved according to the signal frequency from your computer. The monitor can save adjustments for up to 5 user modes. It has 12 factory preset or preload modes, one for each signal frequency as listed in "Display Modes" on page 26.

If you have made no adjustments, the OSD disappears and the monitor does not save anything. To exit without saving the changes you have made, press the **EXIT** button before the 3 seconds elapse.

Direct-Access Features

The features described in this section can be accessed quickly, at the touch of one button. Once you finish making adjustments to a feature, push the **EXIT** button to turn off the menu or allow the OSD to time-out and disappear automatically.

Auto Adjustment

Even though your computer system can recognize your new LCD monitor, the auto adjustment function will optimize the display settings for use with your computer.

Follow these instructions to activate the automatic screen adjustments for your monitor.

- 1 Push the **AUTO** button. The automatic adjustment display appears and the sidebar moves to indicate progress during the auto adjustment procedure.

NOTE: 1. For Auto Adjustment to function correctly, the monitor must display a full screen, colored image such as the Windows desktop.

- 2. Even though Auto Adjustment sets most image adjustments automatically, distortions may remain depending on the video board performance. After using Auto Adjustment, we recommend that you perfect the image by using the OSD functions.*
- 3. The setting time of Auto adjustment may be different depending on the screen image.*

Adjusting Your LCD Monitor

Brightness

Follow these instructions to adjust the brightness of the monitor's display.

- 1 With the menu off, push the “-” or “+” button to display the brightness screen.
- 2 Push the “+” button to increase the brightness; push the “-” button to decrease the brightness.

OSD Lock/Unlock

Use this function to secure the current settings so that they cannot inadvertently be changed, while still allowing you to adjust Brightness and Contrast. You can unlock the OSD controls at any time by using the same procedure as described below.

- 1 Push and hold the **MENU** button for 5 seconds to Lock or Unlock the controls. When locked, a “LOCKED!” message displays along the bottom of each OSD menu screens except the “Brightness” and “Contrast” screens.

On Screen Display (OSD)

Figure 7. On Screen Display (OSD)

Adjusting Your LCD Monitor

Accessing the menu system

- 1 With the OSD off, push the **MENU** button to open it and display the main function menu.
- 2 Use the “–” and “+” buttons to move between the function icons. As you move from one icon to another, the function name changes to reflect the function or group of functions represented by that icon. See the Screen controls table to view a complete list of all the functions available for the monitor.
- 3 Push the **MENU** button once to activate the highlighted function then use the “–” and “+” buttons to move to sub-menus, or according to the indicators on the menu, to make your changes.
- 4 After selecting a function, use the “–” and “+” buttons to make the adjustments. The setting sidebar moves and the numeric value indicator changes to reflect your adjustments.

NOTE: The numeric value indicator is provided as a point of reference only and does not reflect any measurable value.

- 5 Push the **EXIT** button once or twice to return to the main menu to select another function or push the **EXIT** button 1 to 3 times to exit from the OSD.

OSD functions and adjustments

Table 2. Screen controls

| Icon | Menus and Sub-menus | Function Descriptions | |
|------|---------------------|-----------------------|---|
| | | – | + |
| | Brightness | | |
| | Contrast | | |

Adjusting Your LCD Monitor

| Icon | Menus and Sub-menus | Function Descriptions | |
|---|---|---|---|
| | Image Lock: | - | + |
|  | Image Lock: <ul style="list-style-type: none">■ Fine■ Coarse * | Image Lock controls adjust for and limit the amount of noise in the video signal which causes horizontal lines or areas on the screen where the image appears to be unstable and jitters or shimmers. | |
| | | | |
|  | H-Position * |  |  |
|  | V-Position * |  |  |

*NOTE: Depending on the video adapter you are using, the lower limit of the control can not go down to *Min. Number on OSD* or go up to *Max. Number on OSD*. This is due to the video signal characteristics due to the video graphics adapter, and it narrows the range of user adjustable parameter. When your LCD monitor detects this video signal and reaches the limit, it displays information message saying "Limit Reached" to inform you that the parameter can not be adjusted any further.

Adjusting Your LCD Monitor

Table 2. Screen controls (*Continued*)

| Icon | Menus and Sub-menus | Function Descriptions | |
|--|----------------------------|--|----------------------|
| | | - | + |
|  | Reset | Restores the viewing area and color settings to their original manufacturing levels. | |

| 5 | Mic On/Off | Turns the internal microphone on or off. Push the button: | |
| | | ■ In: Off | ■ Out: On |

Appendix

PowerSaver

This monitor has a built-in power management system called PowerSaver. This system saves energy by switching your monitor into a low-power mode when it has not been used for a certain amount of time. The available modes are "On", "Standby", "Sleep", and "Deep Sleep".

PowerSaver operates with a VESA DPMS compliant video card installed in your computer. You use a software utility installed on your computer to set up this feature. See Table 4 below for details.

Table 4. Power-saving modes

| State | Normal Operation | Power-Saving Function mode (EPA/ NUTEK / ENERGY 2000) | | |
|-------------------|------------------|---|-----------------------------------|---------------------------------|
| | | Standby Mode | Sleep Mode Position A1 | Deep Sleep Mode Position A2 |
| Horizontal Sync | Active | Inactive | Active | Inactive |
| Vertical Sync | Active | Active | Inactive | Inactive |
| Video | Active | Blanked | Blanked | Blanked |
| Power Indicator | Green | Amber | Amber Blinking (0.5 sec interval) | Amber Blinking (1 sec interval) |
| Power Consumption | 25W (Nom.) | Less than 3W | Less than 3W | Less than 3W |

NOTE: This monitor automatically returns to normal operation when horizontal and vertical sync return. This occurs when you move the computer's mouse or press a key on the keyboard.

This monitor is EPA ENERGY STAR[®] compliant and NUTEK/ ENERGY 2000 compliant when used with a computer equipped with VESA DPMS functionality.

For energy conservation, turn your monitor OFF when it is not needed, or when leaving it unattended for long periods.

Appendix

Troubleshooting

If you have a problem setting up or using your LCD monitor, you may be able to solve it yourself. Before contacting customer service, try the suggested actions that are appropriate to your problem.

Table 5. Troubleshooting problems – Image

| What you see... | Suggested Action | Reference |
|---|--|--|
| Screen is blank and power indicator is off | <ul style="list-style-type: none">■ Ensure that the power cord is firmly connected and the LCD monitor is on. | Connecting your LCD Monitor, page 5. |
| “No Connection, Check Signal Cable” message | <ul style="list-style-type: none">■ Ensure that the signal cable is firmly connected to the PC or video board.■ Ensure that the PC is turned on. | Connecting your LCD Monitor, page 5. |
| “Video mode not supported” message | <ul style="list-style-type: none">■ Check the maximum resolution and the frequency on the video port of your computer.■ Compare these values with the data in the Display Modes Timing Chart. | Display Modes, page 26. |
| The image is too light or too dark | <ul style="list-style-type: none">■ Adjust the Brightness and Contrast. | Brightness, page 12 and page 13. Contrast, page 13. |

Appendix

Display Modes

If the signal from the system equals to the standard signal mode, the screen is adjusted automatically. If the signal from the system doesn't equal to the standard signal mode, adjust the mode with referring to the Videocard user guide because the screen might not display or only the power LED might be on. For the display modes listed below, the screen image has been optimized during manufacture.

Table 9. Preset timing modes

| Display Mode | Horizontal Frequency (kHz) | Vertical Frequency (Hz) | Pixel Clock (MHz) | Sync Polarity (H/V) |
|-----------------|----------------------------|-------------------------|-------------------|---------------------|
| Mac. 640 x 480 | 35.00 | 66.67 | 30.240 | -/- |
| Mac. 832 x 624 | 49.73 | 75.00 | 57.284 | -/- |
| VGA, 640 x 350 | 31.47 | 70.00 | 25.175 | +/- |
| VGA, 720 x 400 | 31.47 | 70.00 | 28.322 | -/+ |
| VGA, 640 x 480 | 31.47 | 60.00 | 25.175 | -/- |
| VGA, 640 x 480 | 37.50 | 75.00 | 31.500 | -/- |
| SVGA, 800 x 600 | 35.16 | 56.20 | 36.000 | +, -/+,- |
| SVGA, 800 x 600 | 37.88 | 60.30 | 40.000 | +/+ |
| SVGA, 800 x 600 | 46.875 | 75.00 | 49.500 | +/+ |
| XGA, 1024 x 768 | 48.36 | 60.00 | 65.000 | -/- |
| XGA, 1024 x 768 | 56.48 | 70.00 | 75.000 | -/- |
| XGA, 1024 x 768 | 60.02 | 75.00 | 78.750 | +/+ |

Appendix

Changing the Base

Removing the base

- 1** Turn off your monitor and unplug its power cord.
- 2** Lay the LCD monitor face-down on a flat surface with a cushion beneath it to protect the screen.
- 3** Remove the four screws and then remove the Stand from the LCD monitor.

Appendix

Attaching a base

NOTE: This monitor accepts a 75mm x 75mm VESA-compliant mounting interface pad.

- 1 Align the Mounting Interface Pad with the holes in the Rear Cover Mounting Pad and secure it with the four screws that came with the arm-type base, wall mount hanger or other base.

Maintenance of Your LCD monitor

WARNING: To avoid risk of electric shock, do not disassemble the monitor cabinet (except for gaining access to the cable connectors as described on page 6). Users cannot service the monitor. User maintenance is restricted to cleaning as explained below:

Unplug the monitor from the power outlet before cleaning.

- To clean your LCD screen, lightly dampen a soft, clean cloth with water or mild detergent. If possible, use a special screen cleaning tissue or solution suitable for the antistatic coating.
- To clean the monitor cabinet, use a cloth lightly dampened with a mild detergent.
- Never use flammable cleaning material to clean your LCD or any other electrical apparatus.

Regulatory Information

FCC Information

User Instructions

The Federal Communications Commission Radio Frequency Interference Statement includes the following warning:

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television receptions, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

User Information

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

If necessary, consult your dealer or an experienced radio/television technician for additional suggestions. You may find the booklet called How to Identify and Resolve Radio/TV Interference Problems helpful. This booklet was prepared by the Federal Communications Commission. It is available from the U.S. Government Printing Office, Washington, DC 20402, Stock Number 004-000-00345-4.

Warning

User must use shielded signal interface cables to maintain FCC compliance for the product.

Declaration of conformity for products Marked with FCC Logo

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

The party responsible for product compliance:

SAMSUNG ELECTRONICS CO., LTD

America QA Lab of Samsung

85 West Tasman Drive

San Jose, CA 95134 USA

Tel) 408-544-5124

Fax) 408-544-5191

Provided with this monitor is a detachable power supply cord with IEC320 style terminations. It may be suitable for connection to any UL Listed personal computer with similar configuration. Before making the connection, make sure the voltage rating of the computer convenience outlet is the same as the monitor and that the ampere rating of the computer convenience outlet is equal to or exceeds the monitor voltage rating.

For 120 Volt applications, use only UL Listed detachable power cord with NEMA configuration 5-15P type (parallel blades) plug cap. For 240 Volt applications use only UL Listed Detachable power supply cord with NEMA configuration 6-15P type (tandem blades) plug cap.

IC Compliance Notice

This Class B digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations of ICES-003.

Cet appareil Numérique de classe B respecte toutes les exigences du Règlement ICES-003 sur les équipements produisant des interférences au Canada.

MPR II Compliance

This monitor complies with SWEDAC(MPR II) recommendations for reduced electric and magnetic fields.

European Notice

Products with the CE Marking comply with both the EMC Directive (89/336/EEC), (92/31/EEC), (93/68/EEC) and the Low Voltage Directive (73/23/EEC) issued by the Commission of the European Community.

Compliance with these directives implies conformity to the following European Norms:

- EN55022:1998 – Radio Frequency Interference
- EN55024:1998 – Electromagnetic Immunity
- EN61000-3-2:1995 + A1 + A2 – Power Line Harmonics
- EN61000-3-3:1995 – Voltage Fluctuations
- EN60950 – Product Safety.
